

# AluCOMP Digital Information

Aluminium composite panel is known by many brand names and is mainly used in the building industry, in application such as cladding factories and showrooms for that modern new look.

The product is now also widely used in the Sign industry, instead of using colourbond and weathertex, as it is a lighter extremely flat rigid sheeting.

AluCOMP has a three-layer composition, the top and bottom layers are Aluminium sheet and the center core is a low density polyethylene. The paint finish is a high strength polyester coating, which is Acid, Alkali and Solvent resistant.

Also coming in a range of colours which cuts down on production time, being a light rigid panel installation time are reduced.

AluCOMP can be cut by using Guillotine, saw, jigsaw or knife. As the product is Aluminium skinned it can easily be rolled, curved and fabricated.

In the application where corner angles are required, the product can be routed to allow it to bend to right angles.

The AluCOMP panel can be router cut on flatbed router to form complex designs and profiles of any shapes, allowing a wide range of manufacturing design ideas. AluCOMP is great for direct print mounting and can be easily painted.

## Application

- Can be Screen or Digitally printed direct to panel
- Signage Advertisement Shop fronts
- Interior decoration Kitchens Furniture
- Ceiling Showroom Booths
- Trailers Horse floats
- Other industrial applications

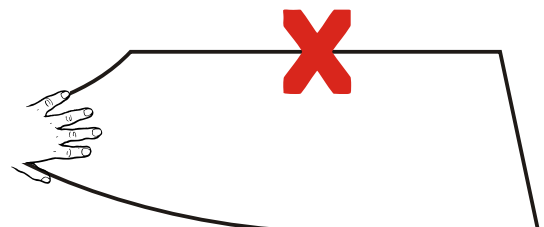

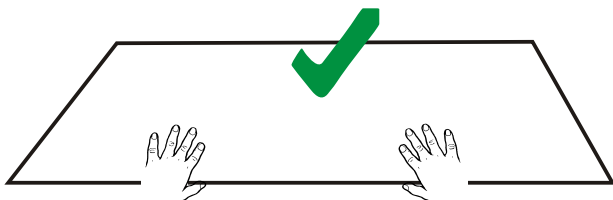

## Handling instruction

When Handling Alucomp it is important to keep in mind the construction of this product, it has an Aluminium thin skin with a polyethylene core so care needs to be taken so as not to buckle sheet when lifting, carrying or transporting.

Always pick sheet up from the middle of the longest edge, lifting sheet in a vertical position so as not to cause damage to sheet.

Do not pick up from corners or fluff sheet, as in when separating colourbond and metal sheets, this will cause the sheet to bend unduly.

# Aluminium Composite Panel

*Light weight easy to use and comes in a range of colours*

**AluCOMP 2mm. Digital Lite** \_\_\_\_\_ 0.12mm Skin D/Sided  
5 Year outdoor ***Not recommended for folding***
